To Do:
√ - Timed random x move
√ - Collision check

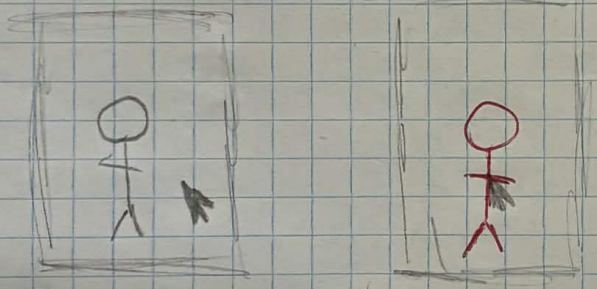

Paint the town random

Time

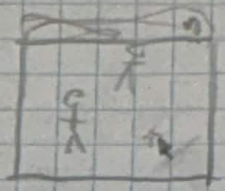

While TimeLim < time
Speed += moveSpeed
timeLim++

- Guys move randomly around a space
- Hover over them and their color changes!

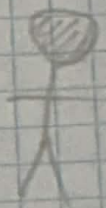

Hit detection for mouse and guy

Future To Do:
- Color isn't random and can be set
- Smooth movement
- Draw actual guys in diagrams instead of simple shapes

- Lil Jits constantly spawn in and clicking on one deletes it.
- the jits spawn faster than you can click

What to do?
- make a class for the jit
  - use 4 loop to make only 50 jits spawn
  - need to learn hit detection

int waitTime =
int timeElapsed
=

WaitTime = Random.Integer(1,10)
TimeElapsed = Time.Elapsed
ActivateTime = TimeElapsed += waitTime
if(TimeElapsed => ActivateTime){
    move guy
}
